A3 Colour MFPs

SHARP

Be Original.

All you need to do more.

Getting things done fast shouldn't mean compromising on quality. These next generation MFPs give you the best of both worlds.

The powerful performance and intuitive control of Sharp's enterprise devices have been recognised with the prestigious Buyers Lab PaceSetter award. Our A3 colour Multifunction Printers (MFPs) build on these capabilities with their enhanced feature set and superior functionality.

They act as a secure information hub within small & medium businesses (SMBs) or medium size workgroups in large organisations. As well as including a range of advanced tools to help you work more flexibly and productively they also provide a simple way to create, use and share all of the information you need.

So, whatever you're doing, whether it's producing meeting materials, printing reports, scanning documents or sending key information by email, and wherever you're working, you can do it all with outstanding speed and simplicity.

Designed to perform.

MFPs help you to achieve much more without working harder.

Fast printing

They also include a Reversing Single Pass Feeder (RSPF)*[1] or a Duplex Single Pass Feeder (DSPF) with a flashing LED*[2] that notifies you if any original documents are left behind, helping you to keep documents secure and GDPR compliant.

Flashing light reminds users to remove original documents.

Easy to use

A tiltable, large 10.1" LCD touchscreen control panel provides easy access to commonly used functions via Easy Mode. Alternatively the screen can customise it simply by dragging and dropping menu icons.

Tilt the panel to suit your requirements.

Efficient storage

A large 500GB onboard Hard Disk Drive (HDD) and a Document Filing feature enable fast and hassle-free printing and scanning.

Consistent quality

Text and graphics on documents from any application are accurately reproduced using Adobe PostScript 3 and an image density sensor maintains a consistent image quality from first page to the last. The Auto Set function also adjusts the scanning settings to optimise the resolution, page size and orientation.

Optimised direct PDF printing

Adobe Embedded Printer Engine (AEPE) enhances printing for the technology driven workplace, delivering up to 80% faster printing from mobile, cloud and USB.

Less waiting

A built-in Motion Sensor avoids any delays by detecting an approaching user and instantly wakes the MFP from sleep mode.

Extra savings

The toner cartridge automatically ejects only when the toner has been fully exhausted, saving toner, minimising waste and supporting environmental goals.

Simple management

Check the status of the MFP with just a quick glance at the lights of the Status Communication Bar.

Distinct light pattens indicate specific MFP functions.

Keeping you safe.

Information is the life-blood of any organisation. That's why the most stringent protection is included as standard.

Always on guard

Enjoy non-stop peace of mind with an innovative Self-Healing System. A master copy of the MFP settings is backed up in a different part of the system. It can be automatically validated before being recovered if the operational system is accidentally or maliciously corrupted. It also avoids any disruption to your business and ensures that valuable information and intellectual property is robustly protected.

Security you can trust

When information is exchanged between an MFP and another application or email system it can be intercepted or compromised. These MFPs include SSL Certificate Validation, which checks all incoming and outgoing communication attempts to prevent any unauthorised or malicious access to your information. This high level of security is often a requirement of government organisations.

Proactive access control

To prevent any unauthorised use, these MFPs automatically monitor access attempts and only grant access to applications and operating firmware that are on an approved whitelist. Any other external applications are instantly blocked, logged and reported.

Military-grade protection

These MFPs conform to the Protection Profile for Hardcopy Devices (HCD-PP v1.0), which is the most up-to-date security validation for business, government and military organisations. So you can confidently handle the most sensitive data knowing that your MFP is incredibly secure.

Safer email communication

Any documents you email directly from the MFP are encrypted using the S/MIME standard. It ensures they can't be intercepted during transmission and are validated as authentic using advanced electronic signatures.

Work your own way.

Being able to work flexibly, at anytime and anywhere, is key to squeezing the maximum value out of every day.

With these next generation MFPs you don't need to waste time fiddling around with complex technology. Their effortless connectivity means you can print, copy, scan and share the information you need quickly and efficiently wherever you're working.

Connections made easy

What could be easier than walking up to your MFP and printing whatever you want without even logging into your PC? With Sharp's Office Direct Print that's exactly what you get. Simply insert a USB memory stick in the MFP and immediately access and print images and Microsoft Office files. You can also scan and save documents straight to the USB stick.

Insert your USB stick and start printing.

For even greater flexibility, any WiFi enabled laptop, tablet or smartphone can directly connect to the MFP without the need to set up a wireless LAN. It allows you to print from a much broader range of devices and in a wider variety of business environments.

And if you operate separate networks in the same workplace, which might have different security or usage restrictions, everyone can still share the same Sharp MFP. These MFPs support dual LANs that can be connected to two different networks, one of which could be wireless[*1].

One simple sign on

There's no need to remember additional usernames and passwords. Instead, you can quickly access public cloud services using Single Sign On (SSO). It lets you securely print and store information using Google Drive™, OneDrive® for Business, SharePoint® Online, Box, Dropbox and Cloud Portal Office with just one log in from the control panel. There's also a Gmail connector for scanning to email and Exchange Online (MS 365 email).

Print where you like

Worried about leaving important or sensitive documents out in the open? Not with the Print Release feature. Simply send a job to print and then, whenever you are ready, just walk over to the most convenient printer, log on and print off your information[*2].

Release print jobs from the most convenient MFP.

[*1] A USB to LAN connector is required for the secondary connection.
[*2] Can be used from any of five network-connected MFPs.

Made for mobility

You'll love how fast and hassle-free printing from a mobile device is. You can link to the MFP in seconds by simply holding it over the NFC card reader[*1] or by scanning the MFP's QR code[*2]. Either way, it configures everything for you.
You can then print from and scan to mobiles and tablets over your wireless network using Sharpdesk Mobile or print from any app that supports Google Cloud Print™ or any Android device with the Sharp Print Service Plugin.

Simpler to manage

Printing or receiving information directly from your business systems and cloud-based applications is made much simpler with Sharp OSA® (Open System Architecture).

And the Application Centre Portal[*3] makes the MFP more adaptable by providing software updates and cloud connector apps that enable agile updating.

[*1] For Android devices. [*2] For both iOS and Android devices. [*3] Available at a later date.

More ways to save.

Our MFPs are designed to help you avoid wasting time and money – without impacting performance.

Even more flexibility

Give your documents a truly professional look with a wide variety of finishing options, including punch, saddle stitching, stapleless stapling and a job separator. Additional capacity paper drawers can also be added to handle the demands of even the busiest office.

Much less energy

As well as producing documents more efficiently, you can also enjoy greater energy efficiency – reducing running costs. Automatic, configurable power settings ensure that the MFP only switches on during set hours. Our low-melt toner reduces the energy consumption on every print or copy run. And the control panel prompts you to choose the most environmentally friendly settings – such as Eco Scan, which prevents unnecessary functions from powering up in the background.
